## STR-SCAN-H700

The Stern Handheld Metal Detector combines simplicity, elegance, and ergonomic design to effectively screen individuals for concealed metal objects. In today's heightened security environment, these devices are essential for preventing unauthorized metal items from entering or exiting facilities.

Ideal for close-proximity screening, handheld detectors provide maximum security and effectiveness. They are equipped with an integrated earpiece for silent operation, making them suitable for environments where discretion is crucial, such as hospitals, auditoriums, hotel entrances, and boardrooms.

Stern prioritizes user safety. These handheld scanners are designed to be safe for all individuals, including those with pacemakers, expectant mothers, and patients. Manufactured under rigorous quality control standards, Stern ensures a high level of detail, sophistication, and safety in all its handheld metal detectors..

## STR-SCAN-H700

DESCRIPTION	PARTICULAR
Make	THE STERN
Model	STR-SCAN-H700
Material of Construction	ABS Plastic
Unit Dimension (in mm)	L380 XW120 XH90
Power Voltage	Standard 9V Battery
Operating Voltage	7V-9V
Alert Indication	Sound, Vibration and Light indication
Sensitivity Levels	Low, Normal, High & Ultra-High Sensitivity
Operating Current/Working hours	Stand-by: Max 10mA, Approx 20 Hours
	Beep: Max 70mA, Approx 2.8 Hours
	Vibration: Max 50mA, Approx 4 Hours
Battery	Standard Rechargeable 9V Battery, 200mAH
Alarm Sound	≥75dB
IP Rating	IP31
Operating Frequency	40KHz
Weight of the Product	200gms
