STR-SCAN-H100

The Stern Handheld Metal Detector combines simplicity, elegance, and ergonomic design to effectively screen individuals for concealed metal objects. In today's heightened security environment, these devices are essential for preventing unauthorized metal items from entering or exiting facilities.

Ideal for close-proximity screening, handheld detectors provide maximum security and effectiveness. They are equipped with an integrated earpiece for silent operation, making them suitable for environments where discretion is crucial, such as hospitals, auditoriums, hotel entrances, and boardrooms.

Stern prioritizes user safety. These handheld scanners are designed to be safe for all individuals, including those with pacemakers, expectant mothers, and patients. Manufactured under rigorous quality control standards, Stern ensures a high level of detail, sophistication, and safety in all its handheld metal detectors..

STR-SCAN-H100

DESCRIPTION	PARTICULAR
Make	THE STERN
Model	STR-SCAN-H100
Material of Construction	ABS Plastic
Unit Dimension (in mm)	L420xW85xH42
Power Voltage	Standard 9V Battery
Operating Voltage	7V-9V
Alert Indication	Sound, Vibration and Light indication
Sensitivity Levels	Low & Normal sensitivity
Operating Current/Working hours	9V battery provides up to 100 hrs of normal operation
Battery	Standard Rechargeable 9V Battery
Alarm Sound	≥75dB
IP Rating	IP31
Operating Frequency	93KHz
Weight of the Product	200gms
